

I am writing about the above "Localism" campaign to say that I am against it. I listen to K-Love on 90.7 here in Virginia Beach and do not wish to lose this station. This station serves the community by providing free listings of free events that occur in our community, which none of the other stations provide. It also provides my family with a radio station that I can turn on without the concern of content. I do not worry about what the radio announcers may say (offensive language or topics) nor do I have to worry about the lyrics to songs played on the station. If "localism" is allowed and K-Love is removed from the air, I will lose this positive influence on my family and this peace of mind as a parent of three children. K-Love provides positive music, positive news stories (which is difficult to find in this day in age), and positive announcers. They bring a fresh look on the day and help uplift our community and show there is good in our community instead of showing only the negative. Please defeat this MB Docket No. 04-233 and keep K-Love on the air. Thank you.

Sincerely,

Susan Harris
